SUMMARY

Senior software engineer with 9+ years building reliable backend systems and developer tooling for high-throughput distributed services. Strength in API design, observability standards, and engineering mentoring. Comfortable owning features end to end from design through on-call rotation. Proven track record of measurable performance improvements including reducing p99 latency and cloud spend while scaling ingestion pipelines to 2B+ events/day.

SKILLS

Languages: Python, Go, TypeScript, SQL · **Infrastructure:** AWS, GCP, Docker, Kubernetes, Terraform · **Data & Messaging:** PostgreSQL, Redis, Kafka, BigQuery ·

Practices:

CI/CD, observability, code review, technical writing, mentoring.

EXPERIENCE

Northstar Logistics — Staff Software Engineer

JAN 2021 – PRESENT

- Led redesign of order-routing service and cutting p99 latency from 1.2s to 280ms for customer-facing APIs.
- Introduced a service-level observability standard adopted by 6 teams; owned on-call rotation tooling which reduced pages per week by 40%.
- Mentored 4 engineers within the team, leading to 2 promotions to senior roles within 18 months.

Brightwave Analytics — Senior Software Engineer

JUN 2017 – DEC 2020

- Built streaming ingestion pipeline using Kafka and Go handling 2B events/day in production environments.
- Cut cloud spend by 25% through right-sizing resources and introducing autoscaling policies on GCP/AWS infrastructure.
- Designed public REST + webhook API utilized by over 300+ customers for data integration needs.

Civic Data Foundation — Software Engineer

AUG 2015 – MAY 2017

- Developed open-data portals using Django serving 1M+ monthly visitors across various platforms.
- Partnered with non-technical stakeholders to deliver grant-reporting tools for data transparency initiatives.

PROJECTS & RECOGNITION

Maintainer of an open-source CLI for log triage (3k+ GitHub stars).
Internal "Engineering Excellence" award, Northstar Logistics, 2022.
Conference Talk: "Observability for Small Teams," RegionalPyCon 2023.

EDUCATION

B.S., Computer Science — State University (2015). GPA: 3.8, Dean's List Recipient
